

Automotive Industry

Maximize your investment in SAP®

Innerware™

Extends the reach and mobility of SAP® throughout your enterprise

Powerful solutions that provide the next level of integrated functionality without complex middleware.

Industry Overview

The automotive industry is a complicated and dynamic industry in which competition is fierce. Companies that want to position themselves in this global industry must be innovative in their approach to business and business processes.

Cross functional processes must be automated in order to remove unnecessary time and costs from every aspect of the business. Ensuring a strong focus on sales and service operations will enable companies to provide a high-quality customer experience.

The integration of information and the efficient sharing of information throughout the value chain is critical in order to enable the reduction of costs, increase profitability and enhance the ability to proactively address customer needs.

You have implemented SAP® and seen how the implementation of an integrated technology solution reduces IT complexity whilst helping to improve business processes.

Now you are looking for better ways to utilize employees, enhance asset utilization, track equipment and allocate materials and resources in the most cost-effective manner.

You are looking to seize market opportunities and provide workers with 'anywhere, anytime' access to vital enterprise resources.

It's time to extend the reach and mobility of SAP® throughout your enterprise. It's time to deliver higher levels of customer service, empower your workforce... and reap a greater return on your investment in SAP®.

Meeting the Challenges

Sky Technologies' solutions are the key to meeting the challenges that are faced in the automotive industry. Sky Technologies delivers a suite of products that bring simplicity, flexibility and reliability to the automotive industry. Sky's solutions are scalable to suit any requirements, are upgrade friendly and future proof.

Benefits

- Developed using Sky's proven 'Innerware™' framework, all solutions will connect seamlessly with your backend SAP® system.
- All solutions will utilize your existing hardware and network, which means that there is no need to invest in expensive infrastructure or middleware.
- By utilizing your existing SAP® skills to build, deploy and manage applications, there is no ongoing need to rely on specialist skills.

Automotive Industry

SkyMobile – SkyMobile empowers field technicians, engineers or other remote service agents to connect, interact and share critical field data on customers, orders, assets and inventory directly with the back office and other value chain stakeholders.

SkyMobile removes cumbersome and poor performing paper based or non-integrated systems and delivers SAP® applications directly to any mobile device, such as a rugged PDA, Laptop, Tablet, PC or BlackBerry®. Examples include:

- **Mobilize warehouse staff and inventory controllers:** With SkyMobile you can process production and inventory transactions as they occur using mobile devices and barcode (or RFID) technologies.
- **Workflow approval on BlackBerry®:** With SkyMobile you can approve your purchase orders, requisitions, leave approvals etc on a BlackBerry®, thereby enabling your staff to respond promptly to both internal and external business demands.
- **Improving maintenance operations by extending SAP® to the field:** With SkyMobile you can schedule SAP® plant maintenance/service orders and notification tasks, allowing your maintenance staff to record completions, material consumption, time, inspections and hazard notifications etc in the field.

SkyConnect – SkyConnect is a powerful suite of integration options that enables you to seamlessly interface your SAP® environment to any number of external systems and devices, without the need for cumbersome middleware. A central management console gives complete visibility of all interface processes, ensuring that transactions are monitored from initiation to final posting.

- **Empower the business users:** Eliminate costly delays by empowering the business owners, hence reducing IT support costs.
- **Automation:** Integrate business processing with RFID, PLC, robotics, EFT, conveyer devices etc.
- **EDI Management Processes:** Document translation and processing inside SAP®, eliminating third party middleware.

About Morse, Inc.

Morse, Inc. is a Global provider of expert SAP® business and technology services. We design, build, deliver and support business critical solutions within SAP®. Seamlessly integrating R/3 and add-ons into the client's business processes, we efficiently support the client's post go-live needs through our SAP® Mobility solutions, NetWeaver and support optimization services.

About Sky Technologies

Sky Technologies specializes in Enterprise Mobility and Integration for SAP®. With a strong focus on innovation, Sky Technologies has developed a technology platform to deliver middleware free mobility (SkyMobile), low cost integration (SkyConnect) and fully functional point of sale (SkyPOS) solutions that are embedded within SAP®.
