

BlackBerry® Solutions

Extend SAP® to your BlackBerry® for efficient workflow authorization

Eliminate the cost and complexity of mobile business solutions

Innerware™

Extends the reach and mobility of SAP® throughout your enterprise

BlackBerry

Powerful solutions that provide the next level of integrated functionality without complex middleware.

Solution Description

SkyMobile removes cumbersome and poor performing paper based or non-integrated systems and reliably automates the workflow authorization processes. In doing so, **SkyMobile** empowers managers with the information and capability that they require in order to perform their jobs more effectively while away from the office and in doing so, achieve business goals.

With **SkyMobile**, the need to log in to SAP® to perform workflow approval is removed, which means that mobile professionals can be as productive, effective and efficient when working remotely as they are in the office.

The **SkyMobile** Workflow Approval applications enable business processes to be executed on a BlackBerry® with seamless integration to SAP®. The process can also be rapidly tailored or extended to suit particular needs.

Typical Applications

- **Purchase order/requisition approval.** The complete list of documents requiring approval (or rejection) can be displayed on the BlackBerry® or alternately, the list can be restricted by entering selection criteria.
- **Shopping cart approval.** Utilizing SAP® SRM solution in the back-office, all information from the shopping cart, is presented on the BlackBerry® (for example total order value, item unit price, quantity, UOM etc) enabling rapid processing.
- **Time and expense approval.**
- **Leave approval.**

Benefits

SkyMobile has been developed using Sky Technologies' proven 'Innerware™' framework, a middleware free approach to SAP® connectivity which integrates the mobile application seamlessly to the SAP® environment. In doing so, SkyMobile allows real-time connectivity to SAP® and stand alone processing to enable offline usage. If offline, updates to SAP® will occur in the background when a connection to SAP® is re-established.

SkyMobile represents a lower total cost of ownership, as there is no need to invest in expensive infrastructure or middleware – you continue to use your existing SAP® (and BlackBerry®) skill base, hardware, infrastructure and networks.

The workflow authorization application(s) synchronize with SAP® in the background, including using highly efficient push technology, so new objects for review will be received automatically and any changes made by the user will automatically be sent to SAP®. Realtime, stand-alone and back-up modes of operation are supported with high availability options, providing automatic store and forward and network connectivity/fault tolerance. With SkyMobile you can streamline and automate your business processes and optimize people time.

Device and Application Management

The **SkyMobile** framework includes a sophisticated and easy to use workbench for creating and maintaining your mobile application. This ensures that the application remains simple to change and easy to support as your requirements change. Any updates are automatically deployed to your mobile devices, eliminating the need for your remote staff to return their devices to head office.

Status	Process	Started	In progress	In error	Clean	Fixed	Failures	%Complete	Restarts	Delte
000	ECS_HOUSEKEEPING	2		1	2					
000	ECS_SCHEDULE_CHECK	36			36		35			
000	ECS_SERVER_CHECK	35			35					

Status	Process	Started	In progress	In error	Clean	Fixed	Failures	%Complete	Restarts	Delte
000	AH_CHE_LOAD	3			3					
000	ECS_SMS_RESEND	78			78					

Interface Management Without Middleware

The **SkyMobile** framework includes complete interface management inside SAP®, using Sky's proven interface management console. With an easy to use 'traffic light' driven management cockpit (as can be seen above), all data and SAP® updates are highly visible and can be easily monitored, thereby enabling proactive interface management.

About Morse, Inc.

Morse, Inc. is a Global provider of expert SAP® business and technology services. We design, build, deliver and support business critical solutions within SAP®. Seamlessly integrating R/3 and add-ons into the client's business processes, we efficiently support the client's post go-live needs through our SAP® Mobility solutions, NetWeaver and support optimization services.

About Sky Technologies

Sky Technologies specializes in Enterprise Mobility and Integration for SAP®. With a strong focus on innovation, Sky Technologies has developed a technology platform to deliver middleware free mobility (SkyMobile), low cost integration (SkyConnect) and fully functional point of sale (SkyPOS) solutions that are embedded within SAP®.
